

Strong majority of Canadians agree that consenting adults should be free to get the sexuality counselling of their choice regardless of their sexual orientation or gender identity.

National Survey | Summary

Conducted by Nanos for Justice Centre for Constitutional Freedoms, March 2021

Submission 2021-1840

Justice Centre
for Constitutional Freedoms

Key Findings

1

CONSENTING ADULTS ACCESSING SEXUALITY COUNSELLING OF THEIR CHOICE

Nine in ten Canadians agree (78%) or somewhat agree (13%) that consenting adults should be free to get the sexuality counselling of their choice, regardless of their sexual orientation or gender identity, and this is consistent across regions, age and gender.

2

VIEWS ON LEGALITY OF SEXUALITY COUNSELLING FOR MINORS

Canadians are divided overall on whether counselling in various scenarios related to gender identity, sexuality and sexual behaviour for minors should be legal or illegal, with about one third of Canadians consistently saying they are unsure.

3

PROVIDING COUNSELLING TO GAY INDIVIDUALS TO REDUCE UNWANTED SEXUAL BEHAVIOUR

Canadians are more likely to say they are uncomfortable (33%) or somewhat uncomfortable (14%) with the government making it illegal to provide counselling for gay individuals to reduce unwanted sexual behaviour while continuing to allow straight people to access those same services (25% comfortable; nine per cent somewhat comfortable).

4

COUNSELLING FOR MINORS WHO WISH TO CHANGE THEIR BODIES

About seven in ten Canadians agree or somewhat agree there should be strict requirements for healthcare professionals to assess whether it's in a young person's best interests to irreversibly alter their body if it doesn't match their gender identity and that counselling services with a 'wait and see' approach should be available to minors thinking about changing their bodies through drug treatments.

Government making it illegal to provide counselling to gay individuals to reduce unwanted sexual behavior

■ Comfortable ■ Somewhat comfortable
■ Somewhat uncomfortable ■ Uncomfortable
■ Unsure

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,016 Canadians, 18 years of age or older, between February 28th to March 4th, 2021 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,016 Canadians is ± 3.1 percentage points, 19 times out of 20.

The research was commissioned by Free to Care and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Justice Centre for Constitutional Freedoms	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1,016 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Estimated Response Rate	Fourteen percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views on real estate, COVID-19 vaccinations, China, and trust in federal political parties.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	February 28 th to March 4 th , 2021.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

NANOS RUTHERFORD MCKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

NRM is an affiliate of Nanos Research and Rutherford McKay Associates. Our service offerings are based on decades of professional experience and extensive research and include public acceptance and engagement, communications audits, and narrative development. www.nrmpublicaffairs.com
