## WHAT CAN YOU DO?

Do you want to live in a country where Digital ID is a prerequisite for access to essential private and public services? Do you want your physical and financial behaviours to be tracked by governments and corporations? Do you want the government to be able to freeze your bank accounts at the flick of a switch?

Canadians must participate in the conversation about how Canadian governments and businesses ought to use Digital ID. The first step is to become informed about Digital ID and the *Charter*.

## **TAKE ACTION!**

# Visit our Action Centre at www.jccf.ca/action-centre

and contact your local MLA/MPP provincially and your federal Member of Parliament. Let them know that Digital ID violates your privacy rights and threatens the constitutional freedoms of Canadians.

## TRACKED AND AND TRACED THE GROWING DIGITAL DICTATORSHIP

### WHAT IS DIGITAL ID?

Where do you spend your time? Where do you spend your money? Have you been vaccinated?

Every day, Canadian governments use Digital ID to learn about you: your speech, your habits, your opinions, your finances, and your body.

You have probably encountered Digital ID already. Perhaps you accessed your provincial online profile to renew your license or to pay a fine. Perhaps you scanned your Covid passport to dine-in or travel. Perhaps you used ArriveCAN to cross an international border. Digital ID can be more comprehensive than physical ID, capturing usernames and passwords, birth dates, social insurance numbers, medical histories, online search activities, and even purchasing behaviours.

Unfortunately, Digital ID technologies equip Canadian governments to act upon what they know about you: to interfere in your personal affairs and, in some cases, to place unjustified restrictions on your *Charter*-protected rights and freedoms. CANADA IS ON A DANGEROUS PATH TOWARDS UNPRECEDENTED GOVERNMENT SURVEILLANCE AND CONTROL - A VERITABLE DIGITAL DICTATORSHIP.

## WHAT ARE THE RISKS OF DIGITAL ID?

WHILE DIGITAL ID MAY BE CONVENIENT, THERE ARE SERIOUS RISKS ASSOCIATED WITH IT.

odifier

**SECURITY OF THE PERSON:** Governments and corporations may deny services to those who choose not to have Digital IDs. In many cases, Canadians have been denied access to essential services, such as shopping, banking, education, and medical care, because they did not have a government-issued Digital ID.

ACCESSIBILITY: In 2021, millions of Canadians, who were exercising their freedom of choice and their right to medical privacy, could not access gyms, restaurants, or movies without a digital vaccine ID.

**INEQUALITY:** Millions of people (e.g., many of those over 65, those with lower incomes, those with disabilities, and the homeless) do not have smartphones and would be unable to participate in a mandatory Digital ID program.

**PRIVACY:** Governments and their branches have already used Digital ID to threaten the privacy of Canadians. The federal government admitted to digitally tracking the faces of travellers in Toronto Pearson Airport in 2016, to tracking 33 million Canadian smartphones during the pandemic, and to freezing the bank accounts of peaceful protestors and their supporters in 2022. The RCMP admitted to using Clearview Al facial recognition technology to track and trace Canadians.
